Entonox bag... taking pain relief where it is needed

The new, versatile Entonox cylinder bag and optional trolley is designed for all healthcare professionals to bring you an all-in-one pain relief package.

Use it as a backpack or trolley for easy mobility, the bag holds two CD size cylinders and everything you need to get therapy straight to your patient, quickly and conveniently.

Features and Benefits

- The ultimate in convenience, designed for all first responders and midwives.
- Portable pain management therapy in one packaged solution.
- Use as a backpack or trolley for easy mobility and reduced handling risk.
- Helps you to bring pain relief to your patient fast and efficiently.
- Carries two CD Entonox cylinders for increased gas capacity.

Carnét demand valve and Entonox cylinders and trolley wheels must be purchased separately.

Entonox bag... taking pain relief where it is needed

Whether you prefer it as a backpack or trolley, the Entonox cylinder bag brings you greater portability and convenience in the delivery of pain management therapy. Safely carrying one or two cylinders and equipped with custom-made pockets, you can be sure to have everything to hand when it matters most.

Features and Benefits

- Secures one or two Entonox CD cylinders safely.
- Adjustable shoulder straps for maximum comfort.
- Large expandable front pocket for medical accessories.
- Transparent window for instant check of cylinder content levels.
- Handy inside pocket for Carnét demand valve.
- Elasticated retaining bands keep shoulder straps away from trolley wheels.
- Durable material and robust construction for lasting service.
- Quickly convert the bag from a backpack into a mobile trolley by sliding the integral flap over trolley wheels* available separately.
